EDUCATION

Jawaharlal Nehru Technological University — Hyderabad, India
Integrated B.Tech + M.Tech in Computer Science and Engineering (2023–2028) — CGPA: 8.45

Indian Institute of Technology Madras — Chennai, India
BS in Data Science & Applications (Pursuing)

FIITJEE Junior College — Hyderabad, India
Intermediate (Class XI–XII) — *Percentage*: 96%

Ganges Valley School — Hyderabad, India
Class X (CBSE) — *Percentage*: 93.4%

EXPERIENCE

Infosys Springboard — Remote
AI Intern — *July 2026 – September 2026*

- Built LLM-backed application features under industry mentorship, covering prompt design, document parsing, and automated evaluation of unstructured text.
- Delivered against a milestone-based review cycle: shipped modular FastAPI services over PostgreSQL, wrote automated test suites, and audited each module against the running system before sign-off.

PROJECTS

SmartHire AI — *AI-Driven Interview & Candidate Evaluation Platform*

- Built an end-to-end AI interview platform on FastAPI and PostgreSQL with JWT plus Google OAuth2 authentication and role-based access for Candidate, Recruiter, and Admin.
- Parsed uploaded résumés and generated role-specific interview questions through a pluggable AI provider layer supporting Google Gemini and local Ollama models.
- Implemented a WebSocket voice interviewer with speech analysis and MediaPipe face-landmark behaviour tracking for real-time engagement and integrity signals.
- Automated answer scoring, shortlist insights, and downloadable PDF reports, surfaced via React dashboards with live analytics and per-endpoint latency metrics.
- Project Link: https://github.com/DivyeshKumarPamarthy/smarthire_ai

Syllabus Note AI — *AI-Powered Study Note Generation Platform*

- Engineered an AI-powered note generation platform that transforms textbooks and PDFs into structured study notes using Retrieval-Augmented Generation (RAG).
- Implemented semantic search via FAISS vector store and HuggingFace sentence-transformer embeddings for accurate, context-aware retrieval.
- Built a production-ready FastAPI backend with JWT authentication, SQLAlchemy ORM, and fully documented REST APIs.
- Integrated local LLM inference via Ollama and OpenAI model support for flexible on-premise or cloud deployment.
- Delivered a responsive Next.js frontend with one-click PDF export for generated study notes.
- Project Link: https://github.com/DivyeshKumarPamarthy/syllabus_notes_ai

Trekking Management Application — *Multi-Role Web & Async Workflow Platform*

- Developed a multi-role platform (Administrator, Trek Staff, Trekker) with authentication, trek booking, slot management, and approval workflows.
- Built RESTful APIs with Flask, offloading notifications and automated report generation to async Redis and Celery workers, with role-specific dashboards for real-time analytics.
- Project Link: https://github.com/DivyeshKumarPamarthy/Trekking-Management-App

Placement Portal — *Full-Stack Placement Management System*

- Built a placement management system with JWT-secured authentication, role-based access control, and CRUD operations, plus a responsive UI for application tracking and result management.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, SQL, HTML/CSS

Web Development & Frameworks: FastAPI, Next.js, Vue.js, React, Django, Flask, Express.js, SQLAlchemy

Machine Learning & AI: LangChain, RAG, HuggingFace, Ollama, OpenAI API, Google Gemini API, Prompt Engineering

Databases & Storage: PostgreSQL, MySQL, SQLite, Redis

Tools & Platforms: Git, GitHub, Docker, REST APIs, JWT, OAuth2, WebSockets, Celery, Microsoft Azure (Learning)
